SOUTH DAKOTA AGRICULTURAL STATISTICS

presented by

SOUTH DAKOTA CROP AND LIVESTOCK REPORTING SERVICE

JOHN C. RANEK, Agricultural Statistician In Charge

S.D. DEPARTMENT OF STATE DEVELOPMENT

HELEN WEGNER, Secretary

Office of Agricultural Development

CHUCK VANDERZIEL, Director

U.S. DEPARTMENT OF AGRICULTURE

Statistical Reporting Service

WILLIAM E. KIBLER, Administrator

PREFACE

Acknowledgement is given to the Office of Agricultural Development, South Dakota Department of State Development for funding this issue of South Dakota Agricultural Statistics.

This bulletin presents state and county crop data, state price/income data for 1983 and state livestock data for January 1, 1984. No county livestock data is available since those state funds were cut. For earlier year's county crop data refer to South Dakota Agricultural Statistics 81/82, 82/83 and Historic Estimates 1976-80.

All current data in this bulletin is preliminary and subject to revision the following year and also after review of the United States Census data each five years.

Acknowledgement is given to the many South Dakota farmers, ranchers, and merchants as well as numerous commercial, educational, and government agencies who have voluntarily contributed basic information used in compilation of these data. Preparation of this publication was done by the staff of the South Dakota Crop and Livestock Reporting Service.

Front Cover: Alice Shaykett of Belle Fourche snapped the "country colorama" cover photograph of an autumn South Dakota farm scene. Alice's photo was honored as one of the winners in the Governor's 1983 Photography Contest.

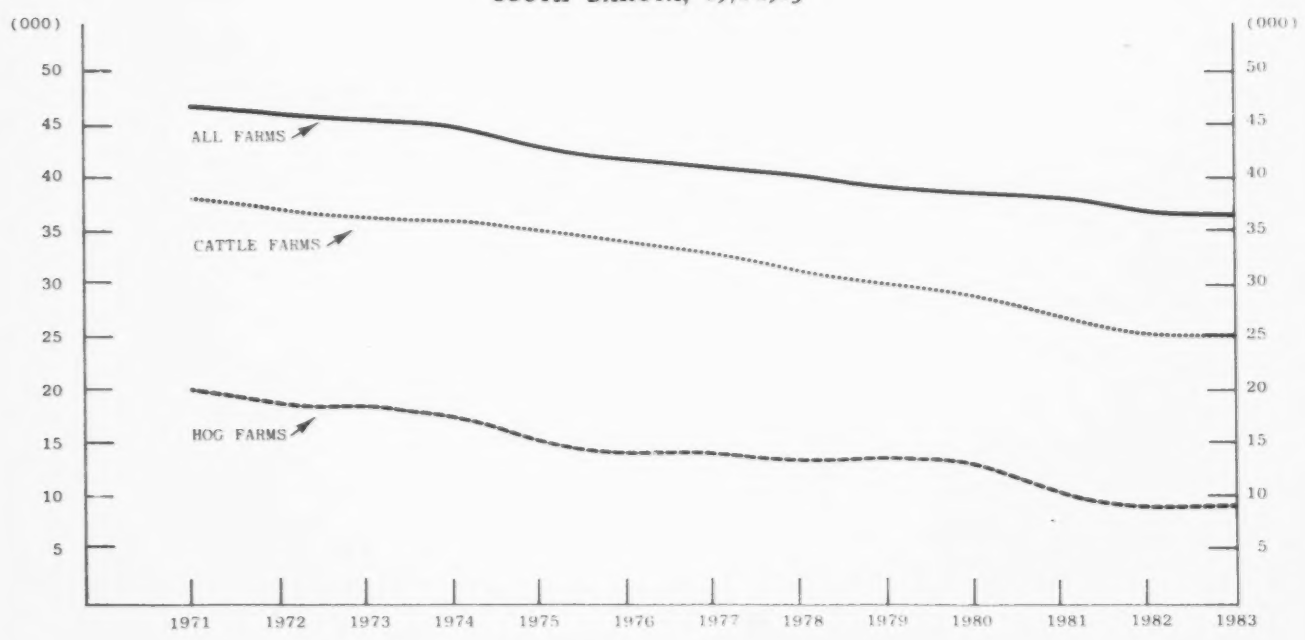
SOUTH DAKOTA, 1971-1983



South Dakota

WEATHER-CROP SUMMARY

GENERAL: South Dakota's 1983 weather started with a normal January. Temperatures remained normal or above normal through March. Precipitation was normal in January and February, but March brought heavy snowfall over most of the State. April was wet and chilly most of the month. Late in the month it was finally dry enough to get into the fields. May was slow for the east and south due to wet weather and saturated fields. Clear, dry weather in June allowed rapid progress in spring planting, but topsoil moisture was getting short across the State. When rain did come as the month ended, it caused major flooding in parts of the southeast. July continued wet in the southeast, but, mid-month brought hot, dry weather. With heat continuing into August, grasshoppers became a real problem, especially in the west, and woolly bear caterpillars hit the soybeans in the east and south. Second cutting alfalfa was lost in several areas of the State because of dry conditions and grasshoppers. An early freeze in late September helped move crop development to normal or above normal progress. Topsoil moisture became adequate by mid-October, and crop progress continued at normal pace. Temperatures in November were above normal for most of the month. Fall harvest was virtually completed by the end of November. Eighteen inches of snow fell over parts of the State during the last week of November. December was extremely cold throughout the month, making it hard on livestock.

JANUARY: January brought above normal temperatures. Less than normal precipitation fell throughout most of the State during the month. The heaviest snowfall occurred during the second week with accumulations of 4 to 15 inches across the State.

FEBRUARY: Temperatures remained normal to above normal for the State through February. Below normal to normal precipitation was the rule throughout the State.

MARCH: Temperatures ranged from below normal to well above normal during the month. Precipitation was heavy over the State the first and last weeks of the month, with very little precipitation in the middle of the month.

APRIL: Temperatures were normal to slightly below normal. Precipitation was light in the early part of the month. Snow fell in the middle of the month dumping up to 6 inches on some parts of the State. At the end of the month it was finally dry enough to get into the fields. Small grain seedings were close to 50 percent behind average at the end of April.

MAY: Fieldwork progressed rapidly during the first week of the month for the north and west, but was slow in the south and east due to continued wet weather and saturated fields. The middle of the month remained slow with very few days suitable for fieldwork. Small grain seedings neared completion. Spring wheat was close to 100 percent emerged by the end of May with 7 percent of the winter wheat headed.

JUNE: June continued clear and dry which allowed rapid planting progress; however, topsoil moisture was getting short to critically short in parts of the State. Mid-June brought some moisture to the east, but the west remained dry. As the month ended, rain came. Rain showers were a welcome sight to farmers in the northeast, but caused major flooding and damage to fields in parts of the southeast. Large portions of the west remained very dry.

JULY: The first week of July continued to be wet. The southeastern part of the State was hit with more flooding that damaged crops; but the second and third weeks brought hot, dry weather. Temperatures were mostly above normal the entire month. By the end of July, small grain harvest was in full swing. Light showers helped encourage rapid crop growth and development.

AUGUST: Winter wheat and rye harvest finished up in early August. Row crops were in need of rain throughout the State most of the month. Grasshoppers were reported across the State and were becoming a big problem in the west. Woolly bear caterpillars started attacking soybeans and had to be sprayed toward the end of the month.

SEPTEMBER: September continued to be hot and dry. Crops were reported in fair to good condition Statewide. Dry conditions and grasshopper infestations caused loss of the second cutting of alfalfa and hurt pastures in several areas of the State. Corn picking got underway later in the month. An early freeze at the end of the month helped to push crop development to near or above normal progress.

OCTOBER: Near or above normal progress on all crops continued throughout the month. Topsoil moisture was mostly short to critically short the first part of the month, but became adequate by mid-month. Cornstalk breakage and poor ear quality were evident during harvest due to heavy corn borer infestations.

NOVEMBER: Temperatures were above normal for most of the month. Precipitation, mostly in the form of rain fell over the east often throughout the month. All of the winter wheat was emerged by the beginning of November and fall harvest was virtually complete by month's end. Up to 18 inches of snow fell on the State during the last week of the month.

DECEMBER: Temperatures were extremely cold throughout the month, averaging 6 to 41 degrees below normal. Snow fell early in the month and stayed around the entire month.

CROP PRODUCTION

SOUTH DAKOTA

Production of most major crops declined in 1983. Only winter wheat, rye and soybeans showed any increase. All wheat production was down 10 percent because of a large decrease in durum and other spring wheat. Winter wheat increased 37 percent to a record 51,250,000 bushels, while durum and other spring wheat declined 40 and 38 percent, respectively. Corn for grain production decreased 46 percent from 1982 and was at its lowest level since 1976. Oat production was 41 percent below that of 1982, but still was above 1981 levels. Barley production was down only slightly at 1 percent. Rye production again jumped dramatically, increasing 87 percent to 8,740,000 bushels, the highest level since 1972. Flaxseed production dropped substantially, down 59 percent, while sunflower production decreased 28 percent. Soybeans increased only slightly, but were at another record level at 24,778,000 bushels. All hay production was down 9 percent and grain sorghum decreased 21 percent from 1982 levels.

Crop yield, overall, dropped on most major crops. Corn for grain dropped 18 bushels, to 55 bushels per acre, the lowest level since 1980. Oats decreased 12 bushels, to 48 bushels per acre, but was still above 1981 yields. Barley and flaxseed yields dropped 1 and 1.5 bushels, respectively, while soybeans decreased 4 bushels and sunflowers lost 49 pounds per acre from 1982 levels. All hay yields were down .05 tons per acre. All three wheat classes continued to increase in yield with winter wheat increasing the most. Winter wheat yields were at 41 bushels per acre, the highest since 1972. Durum wheat and other spring wheat yields rose 3 and 1 bushels, respectively, over 1982. Grain sorghum yields also increased slightly as did rye.

Planted acres of the major crops totaled 13.9 million acres in 1983, well below 1982's 16.6 million acres. The decline was mostly due to the government farm programs. All wheat seedings showed a decline of 870,000 acres. Winter wheat acreage increased by 150,000 acres, but durum dropped 70,000 acres and other spring wheat declined 950,000 acres, to offset the increase in winter wheat. All corn plantings declined 950,000 acres and oats declined 450,000 acres. Soybeans planted increased 130,000 acres, followed by rye with an increase of 100,000 and barley acreage increased 20,000.

Harvested acres of major crops totaled 13.4 million, 17 percent below 1982. Fewer acres planted contributed to most of the decrease. Rye, sorghum for silage, soybeans, and winter wheat made significant increases, while barley increased slightly. All other major crops declined significantly in acres harvested.

UNITED STATES

The Nation's production of every major crop decreased substantially from the records set in 1982. Yields also decreased for most crops.

Unusually cool weather dominated most of the Nation during April. Corn planting began in late April across the Corn Belt. Nine percent of the acreage was seeded at the end of April -- half the normal planting pace. Cool May weather slowed germination and crop development in most regions. June brought frequent showers and thunderstorms which delayed field activities. Corn planting was virtually completed by mid-June and soybean planting was near completion in the Corn Belt. Hot weather and dry soils during July put stress on all crops. A heat wave, centered in the Central and Northern Plains, persisted throughout August. Widely scattered showers late in the month aided in filling out soybean pods in portions of the eastern Corn Belt, but some blossoms and pods were lost due to moisture stress. Corn and soybeans were in poor to fair condition in most of the Corn Belt as dry conditions persisted until mid-September. Freezing temperatures pushed across the Northern Plains into the western Corn Belt. Dry weather across the western Corn Belt during October aided the harvest and drying of corn and soybeans. Harvesting was ahead of schedule in the Corn Belt. Corn harvesting, which was well advanced at the beginning of November, moved slowly to completion during the latter half because of wet conditions. As November ended, soybean combining was nearing completion in the Corn Belt. By mid-December, harvest of the remaining acreage of corn and soybeans moved ahead over frozen fields in the Corn Belt until late in the month when snow stopped harvest.

Acreage of principal crops planted or grown in 1983 totaled 310 million acres, down 52 million acres from 1982, primarily because of government programs to reduce crop acreage. The major crops showing decreases in planted acreage from 1982 were: Corn, 26 percent; sorghum, 27 percent; all wheat, 12 percent; and soybeans, 11 percent. Barley and oat acreages were up 10 and 42 percent, respectively. Much of the increase in oat plantings were seeded on land devoted to conservation use under government programs, and not harvested for grain. Barley acreage, which was not covered under the Payment-In-Kind program may have been increased to offset acreage diverted from corn and, to a lesser extent, sorghum. Harvested acreage totaled 294 million acres, down 58 million acres from 1982.

COMMERCIAL FERTILIZER

Commercial fertilizer sales dropped in the fiscal year ending June 30, 1983. There were 271,030 tons (including carrier) of commercial fertilizer sold in South Dakota in fiscal year 1983, 38 percent below the tonnage sold in 1982. Actual nutrients (NPK) totaled 128,067 tons, down 43 percent. The Farm Program in 1983 contributed to the decrease in fertilizer sales.

Nitrogen accounted for 61 percent of the total NPK. Phosphoric acid accounted for 31 percent and potash accounted for 8 percent.

18-46-0 was the most popular fertilizer with sales of 82,013 tons in calendar year 1983.

The second most popular was Urea (46-0-0) with 66,300 tons sold, and third in sales was 28% nitrogen with 53,608 tons sold.

SOUTH DAKOTA

LIVESTOCK AND POULTRY

Cash receipts in 1983 which totaled $1.6 billion, were down 12 percent from the previous year. Gross income from all cattle, hogs, sheep and poultry during 1983 was $1.4 billion, unchanged from a year earlier.

CATTLE

The January, 1, 1984 inventory of all cattle at 4,220,000 head was 4 percent more than the previous January 1 count of 4,060,000 head. The 1983 calf crop of 1,800,000 head was 1 percent higher than the 1982 calf crop. Average value per head of all cattle on January 1, 1984, was $395, unchanged from January 1, 1983. Cash receipts from sales of cattle and calves in 1983, at $1.06 billion, were 2 percent above last year.

HOGS

The number of hogs and pigs on farms in the State on December 1, 1983, at 1,650,000 head, was 4 percent above a year earlier. The average value of all hogs and pigs was $54.50 per head compared to $86.00 a year ago. The total value of hogs and pigs on hand December 1 was $89.9 million, down 34 percent from a year earlier. Cash receipts from marketings of hogs and pigs were $285.5 million, down 3 percent from 1982. The pig crop for 1983 was 2,561,000 head, 10 percent above 1982. There was an increase of 7 percent in the spring pig crop and an increase of 12 percent in the fall pig crop.

SHEEP

The number of sheep on South Dakota farms and ranches on January 1, 1984, at 730,000 head, was 7 percent above 1983. Stock sheep numbered 660,000 head, up 5 percent from 1983 and sheep on feed numbered 70,000 head, up 40 percent from 1983. The 1983 lamb crop, at 650,000 head, was up 2 percent from 1982. Average value per head of all sheep on January 1, 1984, was $50.00 compared to $48.00 per head on January 1, 1983. Cash receipts from sales of sheep and lambs during the year totaled $29.8 million, down 6 percent from a year earlier.

MILK PRODUCTION

South Dakota milk production in 1983 totaled 1.83 billion pounds, up 4 percent from 1982. There was an increase of 3,000 head in the number of milk cows, and the production per cow increased 208 pounds in 1983. Cash receipts from marketings of milk and cream totaled $227.4 million in 1982 compared to $225.4 million in 1981.

POULTRY AND EGGS

The number of chickens on farms on December 1, 1983, was 1,900,000, a decline of 7 percent from a year earlier. Egg production in 1983 was down 13 percent from 1982, but cash receipts from eggs at $12.8 million were up 65 thousand, with an average price per dozen higher than in 1982. Cash receipts from the sale of turkeys added $13.0 million to gross income in 1983.

UNITED STATES

CATTLE

The Nation's farmers and ranchers had 114.0 million cattle and calves in their herds on January 1, 1984, down 1 percent from the 115.2 million on hand a year earlier. This continues the downward trend in cattle inventories begun a year ago. The number of beef cows decreased 1 percent, but the number of milk cows was up 1 percent. The value of cattle and calves on farms and ranches January 1, 1984, amounted to $45.1 billion, a decrease of 4 percent from a year ago. The average value per head decreased 2 percent from $406 on January 1, 1983 to $396. The Nation's 1983 milk production was up 3 percent from the previous year. The number of cows milked was up 1 percent and the production per cow was up 2 percent from the previous year.

HOGS

Hog and pig numbers in the Nation on December 1, 1983, were up 3 percent from a year ago. The average value per head was $58.90 compared to $90.00 on December 1, 1982. Total value of all hogs and pigs on hand December 1, 1983, was $3.3 billion, a decrease of 32 percent from a year earlier. The 1983 pig crop increased 10 percent from 1982.

SHEEP

Sheep and lamb numbers decreased 5 percent from a year earlier. This is the lowest sheep and lamb inventory of record at 11.4 million head. Stock sheep decreased 7 percent and sheep on feed increased 4 percent. The average value per head of all sheep and lambs increased from $51.80 per head on January 1, 1983, to $52.10 per head on January 1, 1984, resulting in a total value of $594.5 million. The 1983 lamb crop, at 8.15 million head, was 5 percent less than the 1982 crop.

POULTRY

Chicken numbers on December 1, 1983, were 4 percent less than a year earlier. Layer numbers during the year averaged 276.1 million, compared with 286.3 million in 1982. Egg production in 1983 was 68.1 billion eggs, down 2 percent from 1982. The number of turkeys raised in 1983 at 170 million, was 3 percent more than 1982.

SOUTH DAKOTA

INCOME

The 1983 South Dakota cash receipts from farm marketings, excluding government payments, totaled $2,631 million, an increase of 2 percent from the $2,587 million in 1982. Of the 1983 total, $1,621 million resulted from the sales of livestock, poultry and their related products. The sales of crops accounted for nearly $1,010 million in 1983, up 6 percent from last year.

In 1982, cash receipts from marketing livestock accounted for 61 percent of the grand total, including government payments, while cash receipts for crops provided 36 percent. Cattle and calves remained the largest cash income source in 1982 with receipts of $1,026 million, 39 percent of the total. Wheat was second with $384 million, 14 percent of the total; and, hogs were third with 11 percent of the total, generating $303 million.

Government payments to South Dakota farmers accounted for $93 million in 1982, compared with $91 million a year earlier. Payments from the Wheat Program brought in $31 million followed by $21 million from the Feed Grains Program.

Farm production expenditures during 1982, totaled $2,640 million, up 3 percent from the $2,555 million level of 1981. The 1982 realized net farm income in the State totaled $257 million, the lowest level since 1977.

Realized gross income per farm decreased slightly in 1982 to $78,278 compared with $79,331 in 1981. Realized net income per farm; however, declined 43 percent to $6,540, the lowest level since 1977. Realized net income is a measure of change in the farmer's income position, but does not include the value of changes in inventory. Total net income per farm rose only 8 percent, to $16,350 in 1982. Total net income includes changes in farm inventory values.

PRICES

Season average prices during 1983 for most principal crops in South Dakota were up from 1982. Corn and soybean prices were at record levels of $3.10 and $7.95 per bushel, respectively. Sunflower prices rose dramatically from $8.61 per hundredweight in 1982 to $12.90, the highest level since 1974 when the season average price for sunflowers was $17.45. Wheat and rye were down 4 and 22 cents, respectively, while barley, sorghum for grain, and oats were up 38, 25, and 23 cents, respectively. Flaxseed made a comeback after dropping $1.64 in 1982, by increasing $1.56 to $6.85 in 1983. Hay season average prices also made a slight comeback, increasing to $42.00 per ton in 1983.

The 1983 average price for meat animals was down, except for sheep and lambs. Hog prices decreased $4.70 to $46.70 per hundredweight. The average price for beef cattle was $57.10 per hundredweight compared with $58.60 in 1982. The lamb price averaged 60 cents higher in 1983 as compared to the previous year, but the sheep average price stayed even with 1982 at $17.10 per hundredweight.

UNITED STATES

INCOME

The 1982 United States cash receipts from farm marketings totaled $148 billion. Of the 1982 total, 48 percent resulted from the sales of livestock, poultry, and their related products. Crop sales accounted for 50 percent, with government payments covering the remaining two percent. The five leading States for farm cash receipts in 1982 were California, Iowa, Texas, Illinois and Nebraska. South Dakota ranked twenty-fourth in total cash receipts, thirtieth in crops and sixteenth in livestock receipts. Iowa, Texas, California, Nebraska and Wisconsin, in that order, were the five leading States in livestock receipts. California, Illinois, Iowa, Texas and Florida were the top five States in crop cash receipts. The leading States for individual commodities were Texas for cattle and calves; Wisconsin for dairy; Illinois for corn and soybeans; Iowa for hogs; and Kansas for wheat.

Realized gross income per farm for the United States increased 4 percent in 1982 to $68,329. Realized net income per farm was $9,959 in 1982 compared to $9,212 in 1981. Total net income per farm decreased $3,161 from 1981 to $9,188 in 1982.

PRICES

Prices received in 1983 by United States' farmers were up for most major crops. Soybeans showed the greatest increase at $8.19 per bushel, $2.50 above the 1982 price of $5.69. Corn prices rose 70 cents to $3.38 per bushel and sorghum averaged $2.97 per bushel, up 45 cents from 1982. Barley and oats were up 35 and 21 cents, respectively, and all wheat averaged only one cent higher, at $3.56 per bushel. Rye prices declined 26 cents, to $2.11 per bushel, compared to $2.37 in 1982.

The United States annual average price for beef cattle at $55.50 per hundredweight was down 2 percent from 1982, while calf prices increased 3 percent to $61.70 per hundredweight. The hog price, at $46.80 per hundredweight, averaged $5.50 lower in 1983. Lambs averaged $53.90 per hundredweight compared to $53.10 in 1982.

1/ VALUE OF PRODUCTION IS THE PRODUCTION OF A CROP MULTIPLIED BY THE SEASON AVERAGE PRICE WHICH IS RECEIVED FOR THAT PART OF THE CROP THAT IS SOLD. VALUE OF PRODUCTION CANNOT BE TAKEN AS INCOME SINCE THE INCOME FROM THAT PART OF THE CROP WHICH IS FED TO LIVESTOCK IS INCLUDED IN THE INCOME SHOWN FOR LIVESTOCK.

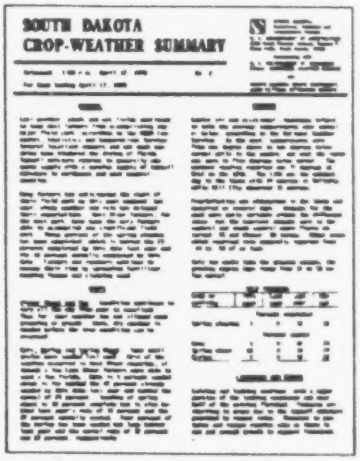
LIST OF AVAILABLE REPORTS

The South Dakota Crop and Livestock Reporting Service publishes official estimates of crop and livestock production, prices received and paid by farmers and various other special reports. The reports containing such data and the approximate date of release are shown below. These reports are free to producers and anyone else who submits reports to the Crop and Livestock Reporting Service. Others need to subscribe by submitting a subscription form and fee to Washington, D.C. Obtain free subscriptions and subscription forms by writing:

South Dakota Crop and Livestock Reporting Service
3528 S. Western Ave.
P.O. Drawer V
Sioux Falls, SD 57117
Telephone: (605) 336-2980 Ext. 235

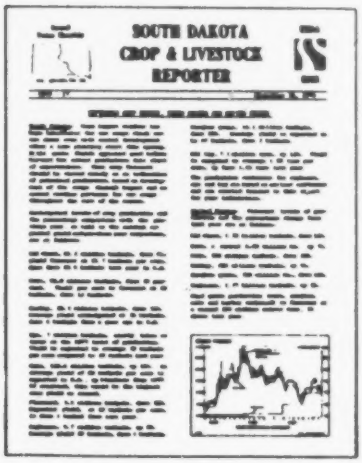
REPORT



"South Dakota Crop-Weather Summary"
(Issued weekly April through October)

Contains weekly summary on progress, status, or happenings relating to crops, livestock and weather.

Annual Fee $12.00



"South Dakota Crop & Livestock Reporter"
(Issued about twice per month)

Contents vary throughout the year to include S.D. and U.S. crop acreages, yield and production, grain stocks, livestock inventories & production, slaughter, wool, milk, poultry, farm numbers, income, farm employment, agricultural prices and miscellaneous reports.

Annual Fee $10.00
